

# Tech Vision XR Technical Rider - Wired Version

(Please provide all items marked in **red**)

## HDMI connection from our iPhone device to your screen

The HDMI resolution from our device is 1920x1080 at 60hz. We have We have audio embedded in the HDMI signal that must play in the room. This will require an **HDMI audio de-embedder or converter** to get audio from our iPhone to your AV and speaker system.

- Our unidirectional high-quality HDMI cable is 25 feet/ 7.6 meters long The **HDMI “connection point” to your system must be located close to the center of the stage.**

## Off- Stage

- **Off-stage table** - minimum table size is 0.8 meter x 1 meter table
- **Power cable 100-240V** for device chargers on table

## Stage size

Two size options depending on which size experience you select:

- **Full size version: 5 meters x 5 meters/ 16.4' x16.4'**(minimum) of clearance
- **Tabletop version: 3.5 meter x 3.5 meters** around the table/ 11.5' x 11.5'(minimum) of clearance, for the tabletop version, we also require a **round table with 120cm/ 47.25” diameter , 80cm height**

## Lighting

- **Even, soft lighting in neutral color at 250-800 lux**

## Presenter support

- **Teleprompter system** with monitors and prompter operator
- **Confidence monitors** to show output of our system to presenter. Ideal configuration is a minimum of 2 screens (1 left, 1 right) for video output from iPhone

## Presentation Media Support

- **PC for Powerpoint with operator and remote clicker.** We will provide a powerpoint deck and require Powerpoint playback and a clicker for the presenter. Required output resolution is 1920x1080, some of our slides might have audio.
